

All blast hits with score > 50, 8/8-gene x/y windows (heatmap range: 2-5+ hits/window)

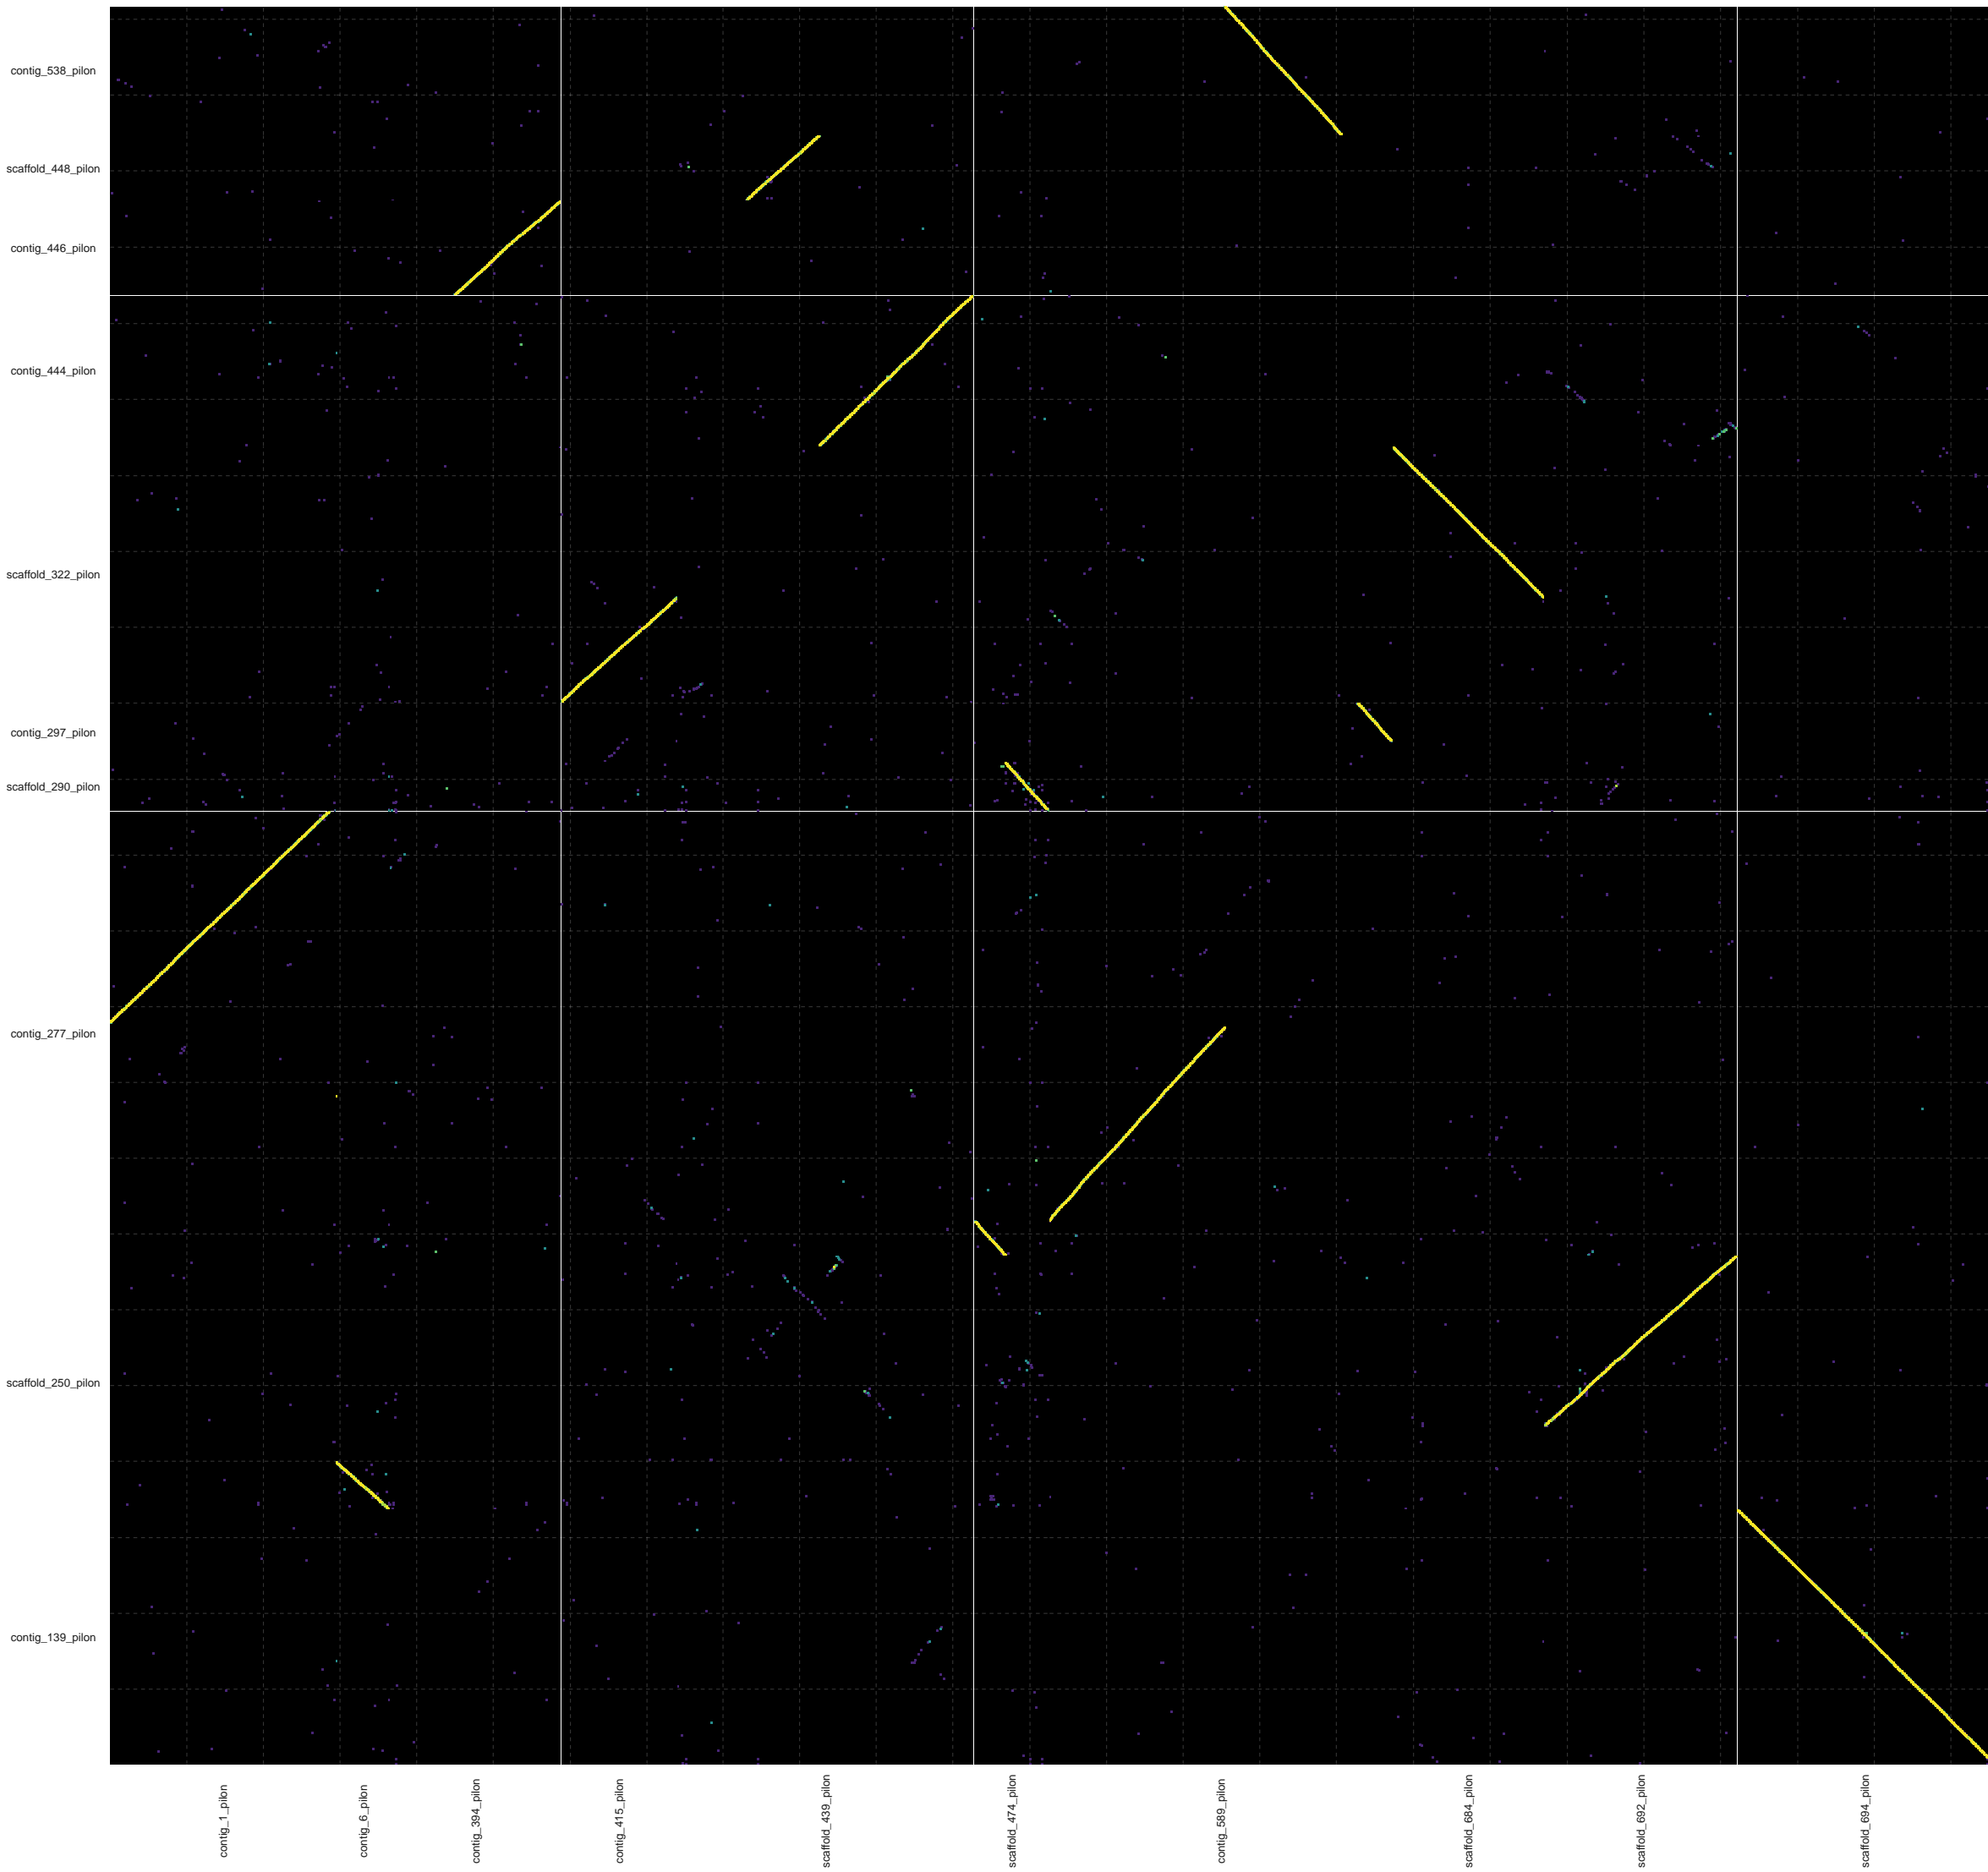

Ler_3: gene rank order position (22354 genes w/ blast hits), grids every 1000 genes

Cvi_0: gene rank order position (23448 genes w/ blast hits), grids every 1000 genes

Blast hits where query and target are in the same orthogroup, 8/8-gene x/y windows (heatmap range: 1-5+ hits/window)

Ler_3: gene rank order position (19983 genes w/ blast hits), grids every 1000 genes

Cvi_0: gene rank order position (20170 genes w/ blast hits), grids every 1000 genes
